Who are NSAN?

A skills-focused membership organisation led by nuclear sector employers.

What do NSAN do?

- Provide cost-effective and practical skills solutions for the nuclear industry.
- Enable members to share best practice and work collaboratively to develop fit for purpose skills solutions.

- 
- Cost-effective way to ensure new Graduates, Apprentices or those joining the nuclear industry obtain comprehensive Awareness in Nuclear either completely remotely or face-to-face.
 - **GAIN** provides a “whole sector” view point, delivering a good level of awareness of nuclear history, nuclear science and the operation of nuclear energy, decommissioning and waste management.
 - **GAIN** can lead to the Award for Nuclear Industry Awareness (ANIA) Level 2 qualification (subject to successful completion of the ANIA exam).

Unit 1 History and development of the nuclear industry

Unit 2 Fundamentals of nuclear science

Unit 3 Application of nuclear energy and waste disposal

Triple Bar courses

Triple Bar Nuclear Manufacturing

Provides an understanding of what is different about the L&M style expected to be able to work confidently in the nuclear supply chain. Suggests tools and techniques to establish the right business culture.

Delivery: Virtual or Classroom

Triple Bar Nuclear Leadership

Introduction to industry expectations in terms of knowledge, quality and behaviours. Provides an understanding of what differentiates nuclear from other industries.

Delivery: Virtual or Classroom

Triple Bar Nuclear Security

Provides an understanding about the fundamentals of nuclear security in the UK focusing on core concepts.

Delivery: eLearning

Triple Bar Existing Sites

Introduction to the requirements for compliance, nuclear awareness and industry behaviours for safe working in the nuclear industry.

Delivery: Virtual, Classroom or eLearning

Short courses that provide a basic introduction to working in different aspects of nuclear.

Nuclear Manufacturing Quality, Codes and Standards

ISO 19443

This course provides a practical understanding of the requirements of ISO 19443 and how to implement them within an existing management system.

ASME for Nuclear Indoctrination

This course introduces the ASME (American or Society of Mechanical Engineers) Section III nuclear design and construction code and explains how the code will be applied in the supply chains.

Introduction to RCC-E

RCC-E is the French standard for the design and construction of electrical equipment for nuclear islands. The failure of which can have consequences on the security of the persons or the nuclear safety of the site.

Nuclear Manufacturing Quality, Codes and Standards

RCC-M

French code required for mechanical equipment in EPR1600 (HPC and SZC).

Demand for training increasing due to SZC announcements.

Few providers deliver in English.

NSAN offers a range of courses both in terms of duration and content.

Most popular 3-day AFCEN accredited.

Potential open course(s) with sufficient demand.

The icon for Skills Assured is a circular arrangement of ten blue leaf-like shapes, resembling a gear or a stylized 'S'.

Skills Assured

An NSAN Initiative

A Skills and Competence Management System

<https://www.nsan.co.uk/page/SkillsAssured>

A secure online system for assessment of competence, against the industry-agreed competence framework and/or organisation specific competencies

A flexible tool to manage skills and capability and help to identify skills shortages

A showcase of individual training, talent and qualifications, supported by all social media applications

Customisable to support organisation branding
