

Lean Quick Wins Toolkit

Three small tools you can start this week. None needs a budget or a consultant. Print them, use them on one area, and let the results make the case for doing more.

1. 5S CHECKLIST: DO ONE AREA, NOT THE WHOLE FACTORY

Step	What to do	Done
Sort	Remove everything not needed in this area; red-tag anything you are unsure about	☐
Set in order	A place for everything that remains, logically arranged and labelled (shadow board for tools)	☐
Shine	Clean the area properly; fix small faults you find while cleaning	☐
Standardise	Agree and display the standard for how the area should look	☐
Sustain	Short, regular check that the standard is held; owner named	☐

2. DAILY HUDDLE BOARD (10 MINUTES)

Same time each day, standing up. Three questions, three KPIs.

What went well?

What did not?

What needs help today?

KPI	Target	Actual
Output		
Quality / right first time		
On-time delivery		

3. FIVE WHYS TEMPLATE

Ask "why" until you reach a cause you can fix, not just a symptom.

Problem / defect:

Why 1?

Why 2?

Why 3?

Why 4?

Why 5? (root cause)

Action (fix the cause, not the symptom):
